## Game Features

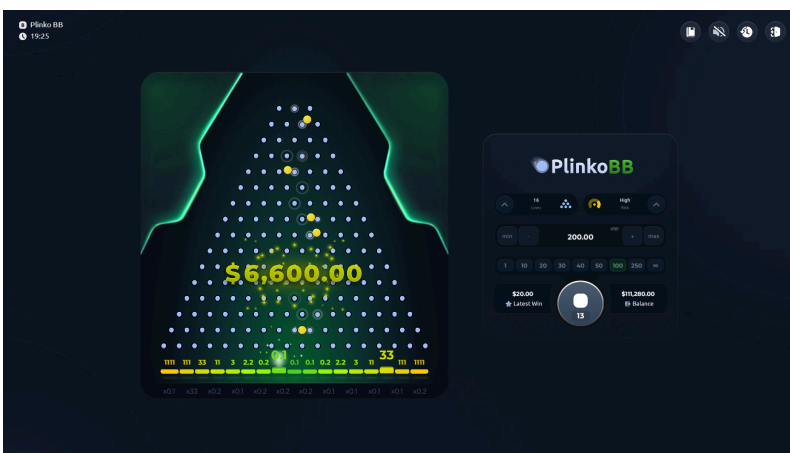

### OVERVIEW

Choose the number of rows, set your bet size and risk level, then press Start to release the ball.

### RELEASING THE BALL

Once released, the ball bounces through the pyramid, ricocheting off pegs before landing in a prize slot. The slot's multiplier is then applied to your bet.

### STAY IN CONTROL

Adjust risk and payouts by selecting from three risk levels—Low, Medium, or High—and choosing between 8 and 16 rows for the peg pyramid. Higher risk levels offer bigger potential payouts but come with greater losses, while more rows add complexity and influence the ball's trajectory.
