

Rocket Bang

Release date: 27.09.2022

Welcome the **Rocket Bang** – a fantastic social multiplayer game everyone should try right now. With its innovative rocket crash format, social features, simplicity and reliability, it's the best choice for fans of risk and excitement. Place a bet or even two before the rocket launches and then decide when to cash out. The longer you wait the greater the reward – as long as the rocket doesn't fly away first. The win is bet multiplied by the multiplier of the lucky rocket. Despite of tension, as you try to guess the correct outcome each time, **Rocket Bang** is a perfect choice for all types of players.

Game Features

Symbols and Payouts

The only symbol in this game is the rocket that might fly away at any time. **Rocket Bang** doesn't have a fixed payout as the multiplier increases when the rocket flies. So, for those, who are looking for something very different, this game is the right choice.

Bets

A player places a bet on how far the rocket can fly or chooses from the range of bets. Furthermore, there can be multiple wins in one round with a two bets feature!

Cash Out

Our game is valid for those, who prefer playing with low risks (early cash out) and those who like to take big risks. The multiplier grows starts at 1x and can grow up to infinity, but there can be an instant crash at 1 as well.

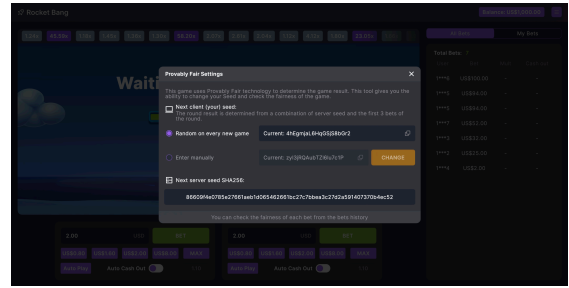

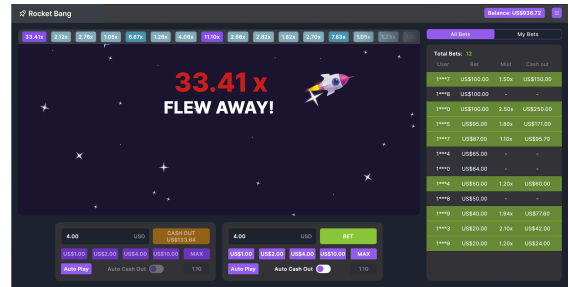

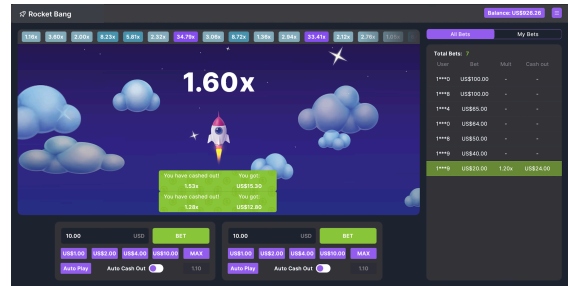

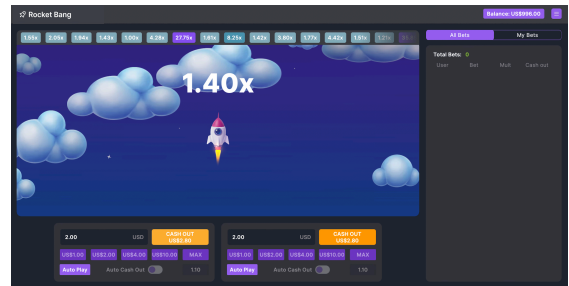

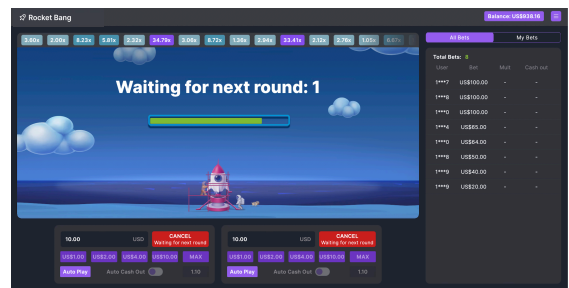

For those, who like to control the risk they're happy to take, there is an Auto Cash Out option to set their odds to cash out at.

Leaderboard

Everyone can see how much other players are betting and winning. Compete with other players in scoring the best result and get listed among the top 100 players or even lead the leaderboard.

Randomization

The multiplier for each round is generated by a 'Provably Fair' algorithm. It is completely transparent, and 100% fair. The fairness of each round can be checked by pressing the Secure Shield icon, opposite the results in the 'My Bets' tab.
